

October 2026 Renovation Updates

Updates through October 20, 2026. Previous renovation updates are available on the RVRMA website for historical context.

Phase 2

Phase 2 work continues in the main-floor locker rooms, restrooms, bar and reception areas. The main locker rooms and restrooms remain closed, and members continue to use the East Wing family changing rooms and restrooms, where towels are available.

Members continue to enter through the Mail Room, with the temporary front desk just inside to the left. Coffee and tea remain available in the Great Room. Construction and the fall leaf dumpster have reduced parking; overflow parking is available on River Valley Ranch Drive and at the Old Thompson Barn. Contractor spaces may be opened to members when they are not needed for the project.

Lap Lanes

Lap-pool vestibule work began on Monday, October 19. The lap pool will remain open, with members walking around the bend of the pool and using the silver ladder to enter the water. We hope to wrap this scope of work within 2 weeks.

Pool Deck Concrete Cracking

The independent review by Simpson Gumpertz & Heger is moving forward, with a site visit scheduled for early November. RA Nelson and Land + Shelter are coordinating participation and access. We should have a high level report to share at our next board meeting.
