

## Aspen Tree Service List

Item	Description
Spruce and Aspen	Dormant Oil Spray and White Pine Weevil Spray. All spruce and aspen in common areas
Pines	Xytec plus Autumn Care Fertilizer and Essential Root Zone Enhancement. 110 Ponderosa pines totaling 1248 inches in trunk diameter - Xytec systemic insecticide provides a full year of control of insects including aphids, soft scales, white pine weevil, cooley spruce gall adelgids, leaf miner and leaf beetles. Essential Plus is a concentrated source of rich, natural organic materials including a natural rooting hormone in combination with kelp extract. This combination of materials stimulate plant growth and rooting while the vitamins, sugars and amino acids make plants strong and healthy.
Aspen	Poplar Borer Spray. All aspen trees in common areas.
Aspen	Essential Root Zone Enhancement plus Arbor Care Fertilizer. All aspen trees around clubhouse, pool and front entries.
Aspen	Orthene Soil Injection plus Deep Root Fertilization. All Aspen around pool and clubhouse area. Inject orthene systemic insecticide to control leaf feeding insects and Arbor Care 15-8-4 fertilizer to improve tree vigor.
Ash	<p><b>Prune - Basic Maintenance</b></p> <p>22 Ash trees from Highway 133 to Orchard Park along Crystal Bridge Drive - Crown clean and thin to remove dead, diseased and broken branches as needed to improve light and air penetration through the tree canopy and reduce weight of heavy branch ends. All branches within the canopy to a diameter of 1" and larger to be targeted.</p>
Cottonwood	<p><b>Remove and Grind Stump</b></p> <p>One tree in open space across from Thompson Corner with large split - Remove tree and grind stump 6-8 inches below ground. Hole to be filled with wood chip/soil mix and excess debris to be hauled off site. Also perform structure pruning on surrounding 5 cottonwood trees.</p>
Hackberry	<p><b>Pruning - Young Tree Pruning</b></p> <p>20 Hackberry along Crystal Canyon. Pruning to establish tree structure and form.</p>
Honey Locust	<p><b>Prune - Basic Maintenance</b></p> <p>36 Honey Locust along Crystal Canyon - Crown clean and thin to remove dead, diseased, and broken branches as well as selective thinning to reduce the density of live branches as needed to improve light and air penetration through tree canopy and reduce weight of heavy branch ends. All branches within the canopy to a diameter of 1" and larger to be targeted.</p>
Cottonwood	<p><b>Prune - Basic Maintenance</b></p> <p>13 Cottonwood trees in Orchard Park - Crown clean and thin to remove dead, diseased, and broken branches as well as selective thinning to reduce the density of live branches as needed to improve light and air penetration through tree canopy and reduce weight of heavy branch ends.
